- Galvalume® is McElroy's standard substrate. G90 is available upon request.
- McElroy Metal features a Kynar 500® coating on all products.
- Solar Reflectance is a measure of the amount of solar energy that is immediately reflected from the surface.
- Solar Emissivity is the ability of a material to emit the residual heat back into the surrounding atmosphere.
- The Solar Reflectance Index (SRI) is a measure of the roof's ability to reject solar heat, considering reflectance, emissivity, and convection across the surface.
